EVALUATION OF THE STANDARD OF INSUTEC PAINT

The Materials & Chemicals Enterprise have been using Insutec Paint of Brooks Insulation Liquid, supplied by Asian General Exclusive Agent Albesti Insutec Paints Pty Ltd, from 1993. It has been applied to paintworks of the General Warehouse of the Ministry of Defence and civil paint works and showed very good finishes. The temperature of the space has been reduced 10 to 15 Degree Celeius in comparison with other works which have not used Insutec paint.

In this connect, we'd like to express our special thanks to the manufacturer of Insutec paint through Albesti Insutec Paint Pty Ltd. We're as well willing to introduce Insutec Paint to other entites that need to use chemicals for insulation and explain them the good performance of Insutec Paint.

For information concerning our works, Pls contact directly with us.
